Seamless Connections, Fewer Clicks!

With built-in integrations like **LaserPro**, **J.D. Power**, **Equifax** and **American Flood** (to name just a few), your tools are working together in one place. These connections help reduce the back-and-forth between systems, saving time and keeping your workflow moving!

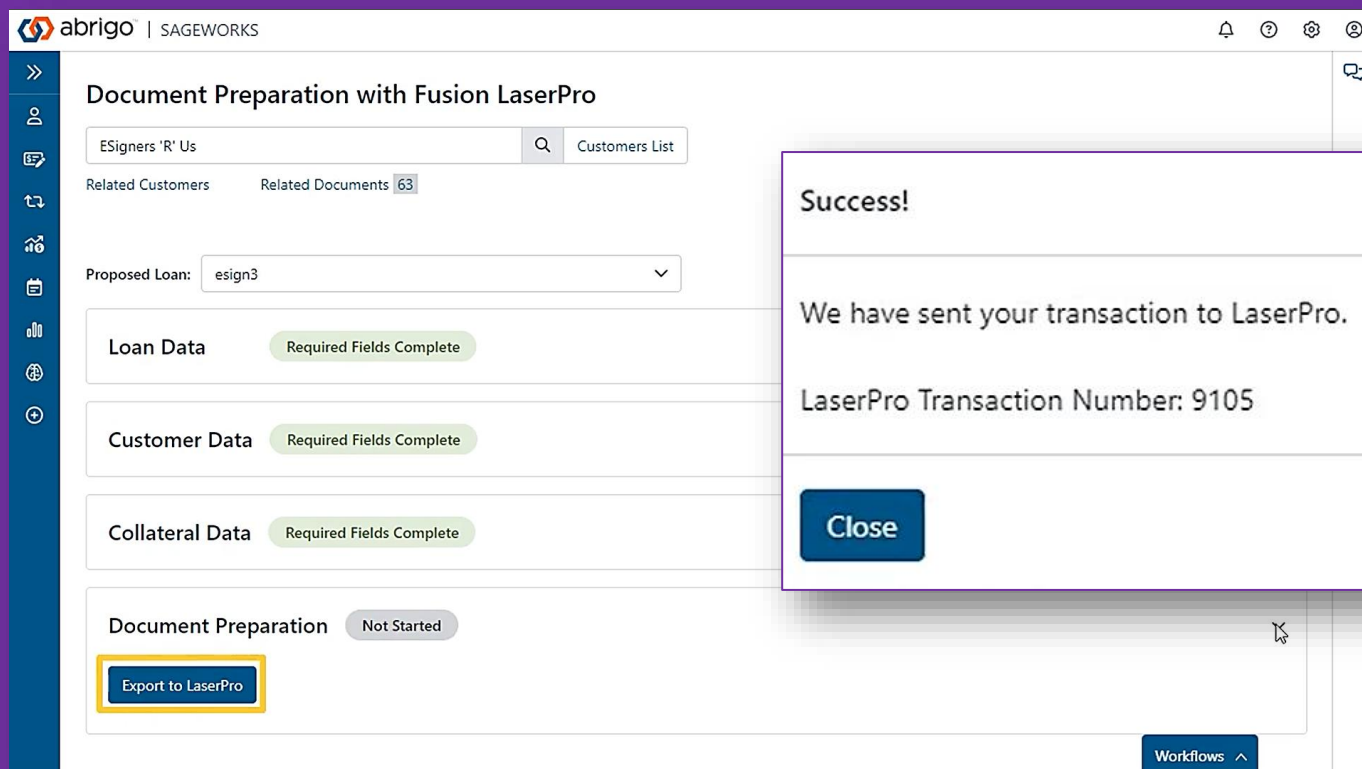

Sageworks integrates seamlessly with **LaserPro** for fast, accurate document preparation.

Through this powerful connection, staff can easily select data within Sageworks and generate documents that flow directly into **LaserPro**.

FINASTRA

This integration reduces manual work, improves data accuracy, validates key fields, and supports hundreds of mapped fields, saving time and enhances efficiency.

Watch this overview: [LaserPro Integration](#)

The screenshot displays the 'Document Preparation with Fusion LaserPro' interface. It includes a search bar for 'ESigners 'R' Us' and a 'Customers List' button. Below are sections for 'Related Customers' and 'Related Documents' (63). A 'Proposed Loan' dropdown is set to 'esign3'. The interface shows progress bars for 'Loan Data', 'Customer Data', and 'Collateral Data', all marked as 'Required Fields Complete'. The 'Document Preparation' section is marked as 'Not Started' and features a highlighted 'Export to LaserPro' button. A 'Success!' modal window is overlaid on the right, stating: 'We have sent your transaction to LaserPro. LaserPro Transaction Number: 9105' with a 'Close' button. The top navigation bar shows 'abrigo | SAGeworks' and the bottom right has a 'Workflows' dropdown.

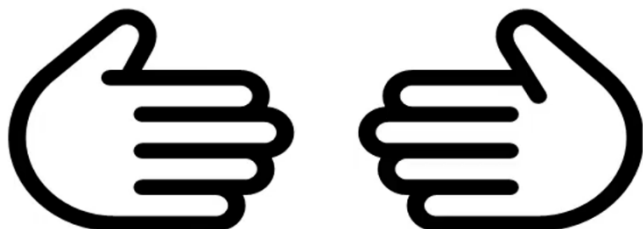

Efficient Flood Certification Ordering

AFR's integration with Sageworks allows you to order new determinations, recertify existing determinations, order by legal description, and have a long legal attached to your final certificate. Users can also edit these determinations via AFR's website.

This partnership streamlines flood compliance and strengthens decision-making across our lending process.

sageworks

Faster Collateral Valuations Through J.D. Power Integration

The Sageworks Loan Origination System integrates directly with **J.D. Power/NADA**, allowing you to pull vehicle valuations without ever leaving the platform. Valuations can be ordered by **VIN** or **Year/Make/Model** and completed reports automatically save to the **Document Library** and populate the **Collateral** page.

To see how it works, check out the video titled [Manually Pulling a J.D. Vehicle Valuation from Collateral](#)

EQUIFAX[®]

Abrigo and **Equifax** have partnered together to provide a seamless experience for pulling credit reports without leaving the Sageworks LOS system. The Equifax credit report will give Texas Regional Bank a full picture of your borrower to ensure credit worthiness.
